FINE GLADIOLUS

1947 - 1948

PERRINE-SCOTT FARMS
ANN ARBOR OR WHITMORE LAKE

Michigan

COVER PICTURE

Yours truly with three spikes of *Grace Stewart Peet* that won the American Home Achievement Award.

One large spike and two small spikes were entered by Mr. Scott in the Michigan Gladiolus Society's Show at Ann Arbor, Michigan. These three spikes, although two were undersize, scored an average 86 over many other very fine varieties. I felt sure that had we exhibited three spikes from medium or large bulbs, we would have had a score up in the 90's.

Believe it or not, the three spikes were cut, in flower, one week before the show; and many of my friends predicted that we would be unable to enter the three spikes in the show; they never heard of such a feat by any glad which they know of up and until that time. But *Grace Stewart Peet* performed this unusual feat! The picture was taken on the eighth (8th) day after these spikes were cut.

This glad will open *from green buds* and when I say green buds I mean like those we receive from Florida during the middle of the winter. This glad is also a *top commercial variety* because it shows so much color at one time and will open to the last bud.

Texture is very heavy—twice as thick as *Picardy*. And, also, it can stand very rough handling—it is tops for florists' use because it can take it.

This is the glad we did not intend to sell for many years to come. But, due to Mr. Scott's untimely death, we have decided to disseminate this wonderful white along with the other fine varieties we list in this catalogue.

ADDRESS ALL MAIL TO
ANN ARBOR OR WHITMORE LAKE, MICHIGAN

INTRODUCTION

△ △ △

As you may already know, on August the 5th, 1947, I lost my fine partner (*Scottie*) Mr. Charles H. Scott. He passed away as he wanted, amid his beloved glads. With these he had worked so hard, as in them he believed to be his outlet for his mind's art.

Now our stock of gladiolus runs into the hundreds of thousands of bulbs, and hundreds upon hundreds of crosses, so I will not be able to take care of them all. After this fall we will have to cut down on our stock as I will be unable to handle the tremendous amount; will use about one acre, only, for some of our fine new varieties which we are disseminating this year and, also, those we will introduce to the trade in the future.

You will note the drastic cut in our prices for named varieties and seedlings. Most of the hybrids we offer as one- and two-year flowering bulbs I would not heretofore sell at any price, many would only be released at high prices (to cover labor, etc.) which would be from 50 cents to \$15.00 apiece. Included in this section are the named crosses such as *Eva Mae*, *Grace Stewart Peet*, *Red Butterfly* (a new flower form), *Professor John Nichelsen* (a new color), *Cora* (the largest orchid on earth), *Dr. Wallace Teed* (the most beautiful red we have ever seen), *Del Riley* (the three-toned upright rose), and many more. Also Iris glad crosses we have never seen in bloom; these are two-year-olds; among them there is a possible chance of getting a sky-blue or a true-blue which will be worth more than its weight in diamonds.

Just a word to those who may condemn a new variety after growing it only one year (as I once did, only to find I was in error on *E. C. Cole*): Never judge a gladiolus to be bad unless you have

grown it from bulblets and they are acclimated to your location. In our trial-garden many kinds proved to be fine only after we had grown them from bulblets. Learned a new trick this year which I will pass on to you. Found that by using five per cent D.D.T. Dust mixed with the fertilizer and used in the bottom of the trench before planting bulbs will really eliminate thrip from being around for a long time. Of course, before planting the corms, cover the dust and fertilizer with a thin coating of soil.

We have a fine selection of selected crosses which we will sell at very low prices in comparison to those of 1945 and 1946—\$25.00 to \$30.00. So if you have some certain color in mind and desire something fine to fill that want, scan the list of Selected Seedlings. Note colors we give and the very low prices. You will receive the complete stock, large bulbs, small bulbs and bulblets, at one low figure.

Commercial varieties were grown by us the last two years from bulblets and 4's, 5's, and 6's. You will find these listed and they are now fine young bulbs. They range in size from No. 5 to No. 1. At the prices given they are a real buy.

Glad seeds were collected from 72 long rows of our U. S. A. seedlings in one trial block. Many folks visiting our shows selected about two thousand kinds which they bought. These seeds are offered by the one-half pint, pint, and quart. The price is reasonable; so try your luck with some as we know that some growers will make a strike with them.

We have a group of C. S. crosses which we were selling from \$5.00 to \$25.00 each, this last summer. Now we are forced to offer them at the low price of \$2.50 for each C. S. complete cross. We have spent many times over on this figure for labor, etc.

At the end of this season we will have for sale many fine items, such as screen-bottom bulb trays, that were made last year. Also a bulblet cleaner and white cloth bulb sacks. Most of these have never been used. They are about 9 x 12-inches. We will sell these at low prices. If you are able to do so, would like for you to see this stock and also our bulbs. And, too, we wish to show you our Kodachrome colored slides of new varieties which are offered for sale this year.

The new kinds have all been exhibited at some show or other over these United States. No variety offered has scored below 78. Most have been either firsts or in the 80's. Then, too, extras are always given with orders. These cannot be purchased from any firm or person.

In closing, we wish to thank you for your past patronage; also for your kind cards and letters.

Δ Δ Δ

TERMS

We have again been favored with a long, favorable growing season with ample rainfall to produce a choice crop of bulbs. My entire acreage is hand planted, carefully cultivated and fertilized. All bulbs are hand dug, cleaned and graded, state inspected and free from disease. It is important these days to purchase the best stock possible. Try our bulbs this year. We have many fine testimonials praising the high quality of our stock and the satisfactory method of filling orders.

We would especially recommend that you place an early order for such varieties as we list.

TERMS: Orders subject to prior sale. Cash with order or 25 per cent down payment, balance C.O.D. Prices are F.O.B. your town. Bulblets liquid measure. Shipment will be made as soon as stock is ready.

EXTRAS: Will be given in seedling bulbs of crosses we do not list that are very valuable. You will receive 10 per cent extras for orders up to \$25.00; 15 per cent for orders up to \$50.00 and 20 per cent for orders above \$50.00 in retail orders only. All wholesale orders are F.O.B. here.

SUBSTITUTIONS: All stock is offered subject to prior sale, so please make a second choice, otherwise we will substitute something equally good or better as we feel our stock is so low priced it will move out of our storerooms fast.

Δ Δ Δ

A SENSATIONAL OFFER !

Unusual crosses to be given away. For many years the gladiolus world and ourselves, included, have worked for a true-blue gladiolus—sky-blue or dark-blue. We, at last, hit upon the idea to cross different gladiolus with true-blue, bulbous iris. The exciting adventure came to fruition when we discovered seed-pods on five varieties of our glads which we had crossed with the iris. Out of this experiment we hope to realize a true-blue.

Each bulb of these Gladiolus X Iris crosses listed below will be a new variety and only you will have that particular kind. And, as I mentioned before, if you should strike the *true-blue* which is seen

in the Emperor Iris your new glad variety would be worth its weight in *Diamonds*, no matter what it weighed! Remember, each bulb we give is a new variety and you will be the only one in the world to have that variety of Gladiolus X Iris, to name and disseminate.

△ △ △

UNFLOWERED GLAD X IRIS

CROSSES:

Bali Coral (new variety) X Iris Emperor
Gaucho (new variety) X Iris Emperor
Kathleen Davidson (new variety) X Iris Emperor
Orchid Seedling (new variety) X Iris Emperor
Yellowstone (new variety) X Iris Emperor

We have decided not to sell these crosses but, rather, to offer these bulbs as premiums with orders which amount to \$30.00 or more of seedling crosses or of new introductions, as follows:

For a \$ 30.00 order 1 bulb, your choice
For a \$ 50.00 order 2 bulbs, your choice
For a \$ 75.00 order 3 bulbs, your choice
For a \$100.00 order 5 bulbs, your choice

(These are given plus the Extras which we always give with any order, and are mentioned under Terms.)

△ △ △

OUR NEW INTRODUCTIONS

For several years back, Mr. Scott and I were going to introduce a bevy of beautiful new varieties; but, as each season went by, we would decide to wait another year just to make sure that our creations would again do that which we had seen them do

to perfection. We wished to make sure of their performance for your benefit. We have tried them on different types of soil and with assorted combinations of fertilizer, checked them for color, height, flower size, type and health; these hybrids have been checked and re-checked to make sure that we would not release something we would not like to receive ourselves. We wished to send out something that would be grand or unusual for you to grow and show. Now to define grand and unusual as it is seen in Our New Introductions:

Grace Stewart Peet is grand because it is the whitest white when placed against any of the old or new ruffled whites; it makes all others we have seen look sort of grey. Unusual because it lasts so long in flower. *U. R. Perrine*, the new red. Color of Jules Amoth—an improvement on that variety and it has, also, a black throat. A new color combination for the book. *Professor John Nickelsen* is grand for its dark, wine-red color—a new, pleasing one, and it is unusual because of its being a wide-open, extra-heavy ruffled, easy-to-grow glad.

Peggy Himler is grand because of its pastel *Nassau* orange color, a new tint, and unusual for this orange does not burn. *Del Riley* is grand because of its three-toned rose color and its unusual earliness.

Kathleen Davidson is grand because of its new color combination, and unusual in that they are edged with silver. *Sue Trick* is grand because of its pastel, sea-coral pink color (a new shade) and unusual because of its ruffling and can hold so many open florets.

Dr. Wallace R. Teed is grand for its wide open, red-ruffled flower and unusual in that so many open at once.

LIST OF OUR NEW HYBRIDS

Δ Δ Δ

Those who send in their orders first for these named varieties will receive the very best sizes in bulbs and bulblets. But, in any case, all will receive only top-quality bulbs of these wonderful new varieties.

The ratings we received on the following hybrids were from many shows to which we sent entries over the country. These varieties if given half a chance will prove what we claim for them.

Abbreviations of color, as V.R. 6, refer to the N. E. G. S. Color Chart.

Δ Δ Δ

GRACE STEWART PEET

American Home Achievement

Rating—86 on 3 spikes, 2 were small, 93 on one spike

Δ Δ Δ

This white variety which is heavy petaled and ruffled is beautiful beyond description for it has everything a good commercial should have and we believe just a little bit more. Those who saw this variety for the last three years seem to like it more each time. You will also, for we believe it will take some time to get a better glad.

The description of this white glad is as follows:

Color White with cream white that Formal type, overlapping just enough, 5-inch heavy wide open ruffled florets, 18 to 20 buds, 8 to 10 open, 10 to 12 showing color, Flowerhead 27 to 29 inches height in field 57 to 60 inches, Foliage medium green stiff

and straight, bulblet production and germination fine. Price per bulb any size \$5.00—bulblets, 5 for \$3.50 with each bulb sold.

Δ Δ Δ

GRACE STEWART PEET'S GOOD POINTS

1. Can be grown in any kind of soil as we have *tested this point*.
2. Will open equally as well inside or out of refrigerator.
3. It is the right size for florist to handle or use.
4. Will hold well under all temperature conditions. A good keeper.
5. Will take fewer spikes to make a beautiful arrangement.
6. Will make a more beautiful imitation-orchid corsage or glamelia corsage (because of its heavy texture and ruffling) for a bride or just a party.
7. Will give salable spikes from small bulbs.
8. Will hold 8 to 12 flowers open for a show or an arrangement, and also show color on ten buds, or more.
9. As the flowers get older they get whiter. The whitest white.
10. Will hold up well under hot weather in your garden.
11. Makes many fine bulblets under good growing conditions.
12. Bulblets germinate well under correct treatment.
13. Will open from green buds.
14. Ships well.
15. We have never noted a crooked spike. *It is always straight.*
16. It is formal.
17. Perfect placement.
18. Florets are firmly attached.
19. Extra fine commercial. You will be able to sell all you grow.

20. Foliage always straight and of good color.
21. Always admired whenever and wherever shown or used.

U. R. Perrine. An unusual color combination among gladiolus. Height 55 inches, length of flower head 27 inches. Foliage straight and upright. Florets 4 inches; 6 open, 6 in color; with spike of 18 florets. Attachment and color same as Jules Amott with the added attraction of a black throat. Good bulblets and germination. Will flower in 75 days. Prices same as *Grace Stewart Peet*.

Sue Trick. A real glamour-star! Salmon-watermelon pink; or "Sea coral with an ivory throat." Between R. 6 and O. R. 5. A straight wiry stem bears a gently-tapering flowerhead of 19 five-inch florets, 8 open, 7 in color. The florets are fluted and ruffled with overlapping placement. Their texture is excellent. Foliage is medium, upright, healthy. Bulb is excellent; bulblet production 150-200; germination very good. This beauty blooms in 75 days. Prices same as *Grace Stewart Peet*.

Peggy Himler. Here is the most wonderful gladiolus we have ever had the pleasure to grow. It does not burn even in our most torrid weather. Color is "Indian and Nassau orange." On the color chart O.R. 4, but brighter with a cream line on lower petal. Twenty florets on straight flower head. Six open, 8 in color. Has a straight stem 59 inches tall. The foliage is medium, upright and healthy. Spike has an overlapping placement of florets. Their texture is excellent; fluted, needlepointed, winged. Foliage medium, upright, and healthy. Bulb excellent; bulblet production 100-plus; germination very good. It blooms in 75 days. Prices same as *Grace Stewart Peet*.

Professor J. Nichelsen An informal, wine-red flowered glad. Deeper than R. 1. Really a "Bahama red." Its straight, wiry stem bears a 23-inch flowerhead. Growing 50 inches high from an excellent bulb, it is adorned with medium-sized healthy leaves. In our extreme hot weather the plain, triangular, wide-open florets are of excellent texture, 20 to the spike, 6 open, 9 in color; size 4½ inches. The many bulblets are of good germination. This beauty blossoms in 85 days. Prices same as *Grace Stewart Peet*.

Kathleen Davidson. A tall-growing glad of formal type with three-toned blossoms of "Folly-red and Apache-rust"; red more warm than R. 4. Sixteen florets, 6 open and 5 in color on a straight wiry stem 57 inches high. Size of florets 5½ inches. Attachment firm. The petals have a silver edge and there is a white line in the throat. Florets are fluted, triangular, wide open. Foliage is broad, upright and healthy. Bulb is excellent; bulblets and germination good. This lovely gladiolus blooms in about 65 days. Prices same as *Grace Stewart Peet*.

Dr. Wallace R. Teed. This extra fine glad was scored 80 by Mr. Everhart. Color "gaiety red and blotch of gaucho red." About O.D. 4 and R. 4. Five-inch florets adorn a 55-inch, straight, heavy stem. Number of florets 16, 8 open, 6 in color. Placement overlapping; florets heavily ruffled and wide open. Foliage broad, upright, healthy. Bulb excellent; bulblets 75-150; germination very good. Blooms in 67 days. Prices same as *Grace Stewart Peet*.

Del Riley. Is grand because of its three-toned rose color and unusual earliness. R. 5 with R. 5 and V. R. 5. Sixteen florets embellish a 45-inch stem; seven open, 6 in color. They are recurved, round, upright. Flowerhead gently tapers. Stem heavy and straight;

foliage broad upright, healthy. Bulbs excellent; bulblets 150, with very good germination. This informal glad will rate 80-plus and blooms in 65 days. Prices same as *Grace Stewart Peet*.

Katherine Wile. This variety has beautiful florets—a very light tint of Rosa Van Lima, of which it is a sport. I have had this one grow to six feet in the garden and is the best of all our sports which I am introducing. Flowhead and all other parts identical with Rosa Van Lima. All of those who saw it at our shows this summer voted for it and exclaimed over its beautiful color. Prices same as *Grace Stewart Peet*.

BASTIAN'S NEW VARIETIES

Phantom Beauty. We have this stock from the originator, and the following prices are for 1947-1948:

	LARGE	MEDIUM	SMALL	BULB'TS
EACH	\$7.00	\$5.00	\$3.00	\$.75
100 SMALL—	\$150.00			
PINT—	\$200.00			

Δ Δ Δ

Supreme Beauty.

	LARGE	MEDIUM	SMALL	BULB'TS
EACH	\$4.00	\$2.75	\$1.50	\$.40

Δ Δ Δ

Prices for collections of our new varieties as *Grace Stewart Peet*, *U. R. Perrine*, *Del Riley*, etc.:

1 bulb each of 3 varieties and 5 bulblets of each.....	\$15.00
1 bulb each of 6 varieties and 5 bulblets of each.....	\$25.00
1 bulb each of 9 varieties and 5 bulblets of each.....	\$35.00

SELECTED CROSSES OF 1944 and 1945

These crosses were selected back in 1944 and 1945 and are fine varieties. We have about five hundred of these separate selections that have anywhere from twenty-five or more large, medium and small bulbs, also many bulbs of a separate seedling (that is, one variety) we now offer at a low-price when compared to prices we had to obtain to make a profit during 1945 and 1946; these are now being sold at a loss because we will not be able to handle this amount of stock since we lack the services of Mr. Scott.

We sold many seedling varieties from this same stock at prices ranging from \$25.00 to \$300.00 apiece; so here goes for a low price on each complete stock of one variety or color of these seedlings. Parentage given. Complete stock of any one seedling for \$5.00.

Set of 6 new seedlings	\$25.00
Set of 12 new seedlings	\$35.00
Set of 25 new seedlings	\$65.00
Complete stock of 6 new seedlings.....	\$25.00

Δ Δ Δ

CHARLES H. SCOTT'S SELECTIONS

Mr. Scott selected about three hundred varieties last year from seedlings of the U. S. A. and U. S. B. crosses. In these two groups we had growing about a million different hybrids.

We sold many out of each section right here on the spot last summer. We received \$5.00 per unit consisting of large bulb, small bulbs and bulblets.

We have to sell the balance of these selections now, so here they go at real low prices to clean them out. One dollar per cross, with parentage given in most cases where we can do so, by reading the stakes.

Anyway you will want some of these as most of them are extra fine and only \$1.00 per bulb plus bulblet and in some cases a few small bulbs.

- 1 C.S. crosses at \$ 1.00 each
- 12 C.S. crosses at \$10.00 each
- 25 C.S. crosses at \$18.00 each
- 100 C.S. crosses at \$50.00 each

Δ Δ Δ

SPECIAL SALE OF ONE AND TWO-YEAR SEEDLINGS — UNFLOWERED

To explain about the seedlings we offer as one- and two-year stock. The two-year were planted late and did not have a chance to flower, so up until now, since this stock was grown, from seed, they have not flowered. But the bulbs are extra fine and beautiful large specimens. The one-year stock Mr. Scott and I had decided not to sell as they were so few and choice in their parentage. We felt we would be giving away some of our best work and prize stock. But they all now go at the ridiculous low prices we here quote.

A word about the quality: these crosses are above reproach. The hundreds of fine letters we have received from customers these past years substantiate our claim. We believe these crosses to be our very best effort because of the experience we have had in the past. "Believe it or not," the hybrid which we call Eva Mae, for

one bulb we were offered \$1,000.00. We refused to sell on account of our need for this type in our hybridizing. As this variety has ribbed flowers, like the Huntress, and is pure white, like Grace Stewart Peet, even the stigmas are white as Grace Stewart Peet. This hybrid stands 5½ to 6 feet high in the field.

We did not offer Eva Mae this year as our stock is limited. Yet we would sell all of this hybrid for \$1,000.00 now.

The Iris which we used to cross with is a variety which can take on gladiolus. They, also, grow from bulbs and is named Emperor. *They have four shades of blue*, running from sky blue to dark blue. If you ever got true sky-blue in a good glad you would have the gladiolus world beating a path to your door!

Mr. Scott kept all stock sprayed with D.D.T. and they were fed at each cultivation. We saw no thrip this year on any of our glad stock.

These one- and two-year seedling bulbs go on sale at these sacrifice prices as follows: each bulb a new variety. Don't miss this opportunity to get some unusual fine crosses.

6 bulbs of	1 cross	\$ 1.00
15 bulbs of	1 cross	\$ 2.00
50 bulbs of	5 crosses	\$ 6.00
100 bulbs of	10 crosses	\$10.00
	* * * * *	

Also our selection of 100 bulbs of 10 crosses	
not listed for	\$7.50
	* * * * *

Mixed seedling bulbs.....	\$5.00 per 100
	* * * * *

Extra bulbs will be given if you pay your express charges.

S E E D S

We have on hand open-pollinated Seeds which were collected from some of our best seedlings and seedling crosses. Seeds from the above and others have given us some very fine glads.

The price is very reasonable, as follows:

One-half pint	\$3.00
One pint	\$5.00
One quart	\$7.50

Δ Δ Δ

WHOLESALE PRICES OF COMMERCIAL GLADS

Bit O'Heaven, Debonair, Early Dawn, Joyful, Lavender Ruffles, Margaret Beaton, Picardy, Sonatine, Sub Deb, Vagabond Prince, White Butterfly, White Camellia, Yellow Emperor and Fine Mixed.

No. 1	\$22.50
No. 2	\$18.00
No. 3	\$16.00
No. 4	\$12.00
No. 5	\$ 6.00
No. 6	(per 1,000) \$ 3.00

Grown from young stock in sand. State inspected. (The fine mixed are from our trial gardens where we had 1,200 varieties which we used in hybridizing. Some kinds in that collection we paid \$15.00 per bulb, many at \$5.00. Bulblets from this planting we are sacrificing at \$15.00 per bushel.)
